

Proceedings of the UK Controlled Environment Users' Group

1991 SCIENTIFIC MEETING

“RECENT DEVELOPMENTS IN CONTROLLED ENVIRONMENTS”

Volume 2

Contents

1.	Solardomes: large scale closed chamber fumigation systems for controlled exposure of plants to air pollutants and elevated concentrations of carbon dioxide. T.A. Mansfield and P.W. Lucas	2 – 3
2.	Controlled environments with UV supplementation. N. Paul	3 - 4
3.	Optimal control of the greenhouse environment. Z. Chalabi	4
4.	The Ecotron - artificial climates for whole ecosystems. R. Woodfin	4 - 5
5.	Microclimate in open-top chambers. A.G. Worthington	5 - 6
6.	DoE Fumigation Laboratory at the University of Lancaster	6
