

# Proceedings of the UK Controlled Environment Users' Group

## 1996 SCIENTIFIC MEETING

### “CONTROLLED ENVIRONMENTS FOR CLIMATE CHANGE RESEARCH”

#### Volume 7

#### Contents

- 
1. Research beyond means - climate variability and plant growth. **J.R. Porter** 2 – 4

---

  2. Possible impacts of increased UV-B - can you extrapolate between controlled environments and the field? **N. Paul** 4 - 6

---

  3. Using the Ecotron to study global warming: Can model communities tell us anything? **T.M. Bezemer** 6 - 10

---

  4. Controlled environment facilities at Newcastle. **C.J. Murgatroyd** 10 - 12

---

  5. Climate change experiments at UCPE from laboratory to remote locations in the field. **J.P. Grime** 12 - 13
