

# Proceedings of the UK Controlled Environment Users' Group

## 1999 SCIENTIFIC MEETING

### “CONTROLLED ENVIRONMENTS AT YORK AND IN GERMANY”

#### Volume 10

#### Contents

---

1.	Plant antifreeze proteins. 1. Biology: <b>M. Smallwood, D. Worrall, L. Byass, L. Doucet and L. Elias</b>	2-3
	Plant antifreeze proteins. 2. Technology: <b>G. Taylor and C. Abbott</b>	3-4

---

2.	Testing growth chambers: the distribution of light, temperature and air humidity in walk-in cabinets. <b>R. Matyssek and Blaschke</b>	4-8
----	---	-----

---

3.	Fumigation research in controlled environments. <b>C. Bell</b>	9-11
----	--	------

---

4.	Analysis of reactive trace gas exchange between plants and the atmosphere under controlled environmental conditions with acetaldehyde emission by trees as an example. <b>H. Rennenberg and J. Kreuzwieser</b>	11-13
----	--	-------

---

5.	Quarantine insects in controlled environments. <b>J. Head</b>	14-15
----	---	-------

---

6.	Nitrogen dioxide - fertilizer or pollutant in trees? A case study in a controlled chamber environment. <b>R. Matyssek, R.T.W. Siegwolf, M. Saurer, M.S. Günthard-Goerg, S. Maurer, P. Schmutz and B. Bucher</b>	15-18
----	---	-------

---
